## Little Hearts Matter

LHM is a national charity that offers support and information to anyone affected by a diagnosis of complex single ventricle heart disease (half a heart). Around 600 babies are diagnosed as having half a working heart each year. In the past most of these children would have died, but thanks to the development of life-saving surgery many now survive, although their hearts will never be normal. The children have to live within the restrictions that their condition creates. For many of them a transplant will be needed before they reach adulthood.

**Little Hearts Matter believes that half a heart should not mean half a life.**

Proceeds from this event will help our members feel less alone.
